

We are currently in negotiations with AMC Networks to continue to offer their networks to you, including AMC, WE tv, IFC and BBC America. You are NOT at risk of losing any of these networks prior to May 1st, because AMC must contractually provide them through this date. We are working hard to give you the services you want at the best value possible. We must, in good faith, notify you that AMC is asking for extraordinary terms and tremendously high rate increases. At this point, AMC is not showing any interest in negotiating terms and rates that will allow us to continue to carry their service. We will update as we move through these negotiations.

Thank you,

CimTel Management
